 Denver, Colorado, United States

Professional Summary

Software developer with a unique blend of technical expertise and proven sales acumen. Currently pursuing Masters in Information Systems at Colorado State University. Passionate about building user-centric applications that solve real business problems. With the advent of modern development tools like Cursor, Lovable, and Claude Code, I've rekindled my deep love for software development and successfully built production-ready applications. Strong communicator with experience managing stakeholder relationships and translating business requirements into technical solutions.

Key Strengths: Full-stack development, API design, user experience optimization, stakeholder communication, problem-solving, and rapid prototyping.

Technical Skills

Frontend Technologies:

- Languages: TypeScript, JavaScript, HTML5, CSS3
- Frameworks: Next.js 14, React.js, App Router
- Styling: Tailwind CSS, PostCSS, Responsive Design
- UI Libraries: Radix UI, Lucide React, Framer Motion

Backend & Database:

- Node.js, RESTful APIs, WebSocket integration
- Database: Prisma ORM, SQL
- Real-time: Socket.io for live data streaming

State Management & Data:

- Zustand for global state management
- TanStack Query (React Query) for server state

- React Hook Form with Zod validation

Development Tools & DevOps:

- Version Control: Git, GitHub
- Testing: Jest, Playwright, Testing Library
- Build Tools: ESLint, Husky for pre-commit hooks
- Deployment: Docker, Render, Vercel
- Package Management: npm, yarn

Integrations & APIs:

- Twilio for communications
- WebSocket for real-time updates
- Third-party API integration and management

Data Visualization & Analytics:

- Recharts for interactive charts
 - Dashboard development and metrics tracking
-

Featured Project

Mohit AI - Autonomous Inbound SDR Platform | mohit-ai.com

Full-Stack Developer | 2024 - Present

Designed and developed a comprehensive SaaS platform that automates inbound lead qualification and response management for sales teams.

Technical Implementation:

- Built responsive frontend using **Next.js 14** with TypeScript and Tailwind CSS
- Implemented real-time dashboard with **WebSocket integration** for live lead monitoring
- Developed RESTful APIs for lead management, analytics, and user authentication
- Created interactive data visualizations using **Recharts** for response metrics and conversion tracking
- Integrated **Twilio API** for automated communication workflows
- Designed mobile-first responsive UI with **Radix UI components**

Key Features Developed:

- Real-time lead queue with live status updates
- Advanced filtering and search functionality
- Automated response time tracking and analytics
- Team performance dashboards with conversion funnels
- Bulk lead import and assignment systems
- JWT-based authentication and authorization

Business Impact:

- Reduces manual lead qualification time by 75%
 - Improves response time tracking and team accountability
 - Provides actionable insights through comprehensive analytics dashboard
-

Professional Experience

Productiv | Sales Development Representative

May 2025 - Present | Denver, CO

Bridge technical and business teams to optimize SaaS spend and implement governance solutions.

- Collaborate with CIOs and IT teams to implement technical solutions for SaaS management
- Analyze complex software architectures to identify optimization opportunities
- Build data-driven models for cost reduction strategies, achieving \$500K+ in cost avoidance
- Create automated workflows and alerts for sustainable governance practices

Lucidity | Cloud Consultant

January 2024 - August 2024

Developed technical solutions for cloud optimization and infrastructure management.

- Researched and analyzed cloud architectures for performance optimization
- Built automated outreach systems and engagement tracking mechanisms
- Created technical documentation and training materials for development teams
- Optimized email templates and workflows, improving response rates by 40%

Rippling | Sales Development Representative

April 2022 - January 2024

Achieved top performance metrics while building scalable sales processes and tools.

- Developed automated pipeline management systems and tracking workflows
 - Built and optimized sales funnel processes, achieving 125% quota attainment for 11 consecutive months
 - Created data-driven sales strategies and performance tracking systems
 - Collaborated with engineering teams on product feedback and feature requests
-

Education

Colorado State University | Masters in Information Systems

Graduated: May 2025 | Computer Systems Focus

JAGSoM - Jagdish Sheth School of Management | Master of Business Administration

2019 - 2021 | Marketing Specialization

University of Virginia | Super Specialization in MarTech

2020 | Marketing Technology Focus

Manipal University Jaipur | Bachelor of Computer Application

2015 - 2018 | Information Technology Major

Certifications

- **Fundamentals of Digital Marketing** - Google
 - **MarTech Super Specialization** - University of Virginia
-

Core Competencies

Technical: Full-Stack Development, API Design, Database Management, UI/UX Implementation, Performance Optimization, Testing & Debugging

Business: Stakeholder Management, Requirements Gathering, Project Management, User Research, Market Analysis, Cross-functional Collaboration

Soft Skills: Strong Communication, Problem-Solving, Analytical Thinking, Team Leadership, Adaptability, Time Management

Why I'm Passionate About Development

Throughout my career, I've always been drawn to the intersection of technology and human interaction. My background in sales has given me invaluable insights into user needs and business requirements, while my technical education provided the foundation for building solutions. With modern development tools like Cursor, Lovable, and Claude Code democratizing software development, I've been able to reignite my passion for coding and build meaningful applications that solve real problems.

My unique combination of technical skills, business acumen, and communication abilities allows me to bridge the gap between stakeholders and development teams, ensuring that the software we build truly serves its intended users.
